

MSR Daily High COPE Course Inspection DATE: _____

The following form should be used to conduct the **MSR High COPE Course** inspection. This inspection should take place every day of specific use for any of the MSR High COPE Course Elements. Check each item as it is reviewed and note comments. In addition to the below inspection criteria, all elements should be checked for overhead widow makers, proper ground cover, and general safety precautions. After completion of this form, please file in the **MSR COPE Course Inspection Notebook**.

***If any significant findings are discovered, please send an email to mcc.copeclimbing_cmte@googlegroups.com and include applicable supporting detail (e.g. text and pictures).*

High COPE Elements

_____ Caving Ladder

_____ Multi-Vine

_____ Heebie Jeebie

_____ 2 Line Bridge

Components Inspection Criteria

_____ Connections All connections appear to be sound with appropriate back-ups.

_____ Cables Cables contain no burs and show no sign of wear.
